Paul Gates
Alaska Regional Coordinator
U.S. Department of the Interior
1689 C. Street, Room 119
Anchorage, AK 99501

Dear Mr. Gates:

Re: USDO1 Facilities on the Federal Agency
Hazardous Waste Compliance Docket

Your facilities listed on the attached page appear on the February 12, 1988 and on the November 16, 1988 Federal Agency Hazardous Waste Compliance Docket (Docket). In accordance with the Comprehensive Environmental Response, Compensation Liability Act as amended by the Superfund Amendments and Reauthorization Act (CERCLA/SARA), you are required to submit for each of these facilities, a Preliminary Assessment (PA), and if necessary, a Site Investigation (SI) to EPA no later than 18 months after the Docket listing. For those on the February 12, 1988 Docket, these PA/SI's were due by April 17, 1988.

Our records show that you have not submitted the required PA/SI for some of these facilities. If our records are correct, you are in violation of the CERCLA/SARA Federal Statute and are subject to third party lawsuits for your failure to comply.

Some other PA's you submitted (see attached lists) were not adequate for us to evaluate these sites for potential inclusion on the National Priorities List. As such, additional investigations were recommended that would allow you to obtain sufficient information to complete your PA/SI obligation.

Enclosed for your convenience is some information that will assist you in developing the required PA/SI. The PA/SI should be sent to our Alaska Operations Office. If you wish to discuss the efforts that will enable you to come into compliance with Federal Statutes, contact Doug Johnson at:

U.S. Environmental Protection Agency
Room 537, Federal Building
222 W. 7th Ave., # 19
Anchorage, AK 99513-7588 (907)271-5083

USEPA SF

1407541

Please let Doug Johnson know within five days of receipt of this letter when we may anticipate receiving the information necessary to fulfill your obligation.

Sincerely,

original signed by Louisville
George C. Hofer, Chief
Federal Facilities Section
